

## **Post-Doctoral Position Available January 2012**

The lab is situated at NIAMS and there is an opening for a Post-doctoral position - at least a 2 year position - usually 4-7 years.

Our focus is on phosphate metabolism and mineralized tissues and interactions with soft connective tissues. We would like DDS/Ph.D., but any outstanding scientist would be great. The position is available in Jan 2012. The candidate does not have to be a U.S. citizen.

Skills preferred but again an outstanding researcher is the first priority: skeletal/mineralized analysis; tooth development; work with animals including colony planning, handling, surgeries; cell and organ culture and Molecular biology including signaling analysis.
